SUMMARY

Just call me Nicu! As a Front End Developer with a background in game development and 3D art, I combine programming and design skills to create exceptional web applications. Passionate about technology, I am committed to continuous self-improvement and aspire to become a Senior Full Stack Developer. My expertise includes Typescript, Javascript, React.js, HTML, CSS/SCSS with BEM methodology, Rest API, Git, and more.

TECHNICAL SKILLS

- Typescript, JavaScript
- React, Redux
- HTML5, CSS3, Sass (SCSS), BEM, Bootstrap, Bulma, Material UI, Tailwind
- Algorithms 300+ solved in last 6 months
- Big O Notation
- Git/Github, NPM, VS Code, Chrome Developer Tool (incl. React), Webpack
- Fetch, REST API, Web sockets
- NodeJS, ExpressJS, NextJS
- Basic knowledge SQL, PostgreSQL
- OOP understanding, C# - Unity knowledge

EXPERIENCE AND PROJECTS

Frontend Developer Apprenticeship | Sept 2022 - Feb 2023
More details at the education section!

Frontend Developer Projects | 2021 - Present
Technologies: JavaScript, React, Typescript, HTML, CSS, SCSS, BEM, REST API

See some of my projects:

Landing page for MyBike

Responsive landing page for mobile, tablet and desktop. Technologies used there are html for markup , SCSS preprocessor for styles, BEM methodology and some lines of javascript.

Todo App with API

API is used, starting with creating an account with your email and name. You can post, update, delete, and also get the todos from the previous session. Everything is saved to the API.
